Product

Free your data from documents.

A toolbox of flexible APIs for all your needs.

Parse

Split

Automatically separate multi-document files or long forms into individually useful units. Intelligent heuristics and layout-aware splitting keep your pipelines clean and efficient—no manual pre-processing needed.

Extract

Use cases

Powering the world's best AI teams.

Reducto parses complex documents and creates LLM-ready inputs with unparalleled accuracy.

Use case

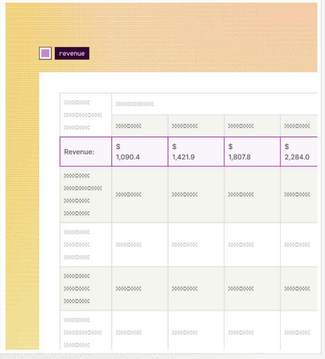
Finance

Empower your AI products with better inputs. From dev tools to automation workflows, tech companies trust Reducto to parse millions of pages with minimal engineering lift.

Start extracting

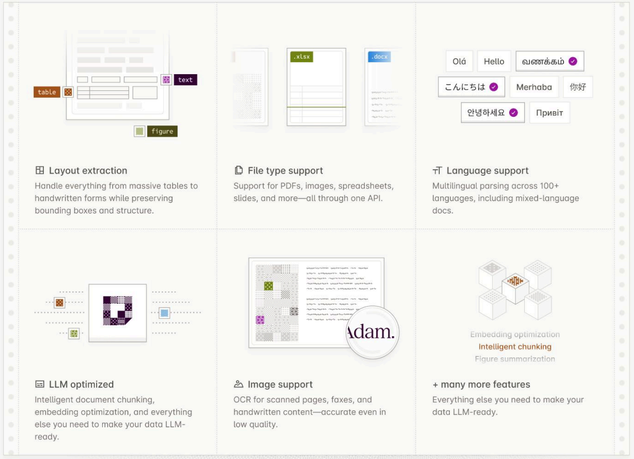
Reducto is behind the scenes powering some of the biggest AI product launches.

— Jenny Kelly CTO, Airtable | Airtable



best AI teams.

Reducto parses complex documents and creates LLM-ready inputs with unparalleled accuracy.



Layout extraction

Handle everything from massive tables to handwritten forms while preserving bounding boxes and structure.

File type support

Support for PDFs, images, spreadsheets, slides, and more—all through one API.

Language support

Multilingual parsing across 100+ languages, including mixed-language docs.

LLM optimized

Intelligent document chunking, embedding optimization, and everything else you need to make your data LLM-ready.

Image support

OCR for scanned pages, faxes, and handwritten content—accurate even in low quality.

+ many more features

Everything else you need to make your data LLM-ready.

Enterprise-ready.

Reducto parses complex documents and creates LLM-ready inputs with unparalleled accuracy.

Chat with us

99.9%+ uptime

Battle-tested infrastructure you can trust in production and at scale.

SOC2, HIPAA compliant

Enterprise-grade security, certified for sensitive and regulated data.

Enterprise support and SLAs

Hands-on forward deployed support and tailored SLAs to meet your enterprise needs.

Deploy in your environment

Run Reducto entirely within your own infrastructure—ideal for strict security, compliance, and data residency requirements.

Widely trusted by enterprises worldwide
